

XM Radio provides many benefits. Many people who travel between states rely on XM Radio for weather and traffic information. It is difficult to find local radio stations that will broadcast traffic and weather information nationally - XM Radio does. For example when I travel from Ohio to New York City. Xm Radio helps me finding out which bridge/tunnel is best to take and how to get to the hotel/house I am looking for in the best way. In addition it helps me learn what I need to wear and how the weather is in NYC. In addition, XM Radio provides great service at a great price. XM Radio is membership only program, if some one is offended or is unhappy with the content they may just cancel the service or switch to another provider. Beeing an XM Radio subscriber for the last 2 years, I urge you to reject NAB's petition 04-160. It does not make sence for bussness travelers.
